Publication Number: CRSP Research Report 12-299

The CRSP will not be distributing this publication. Copies may be obtained by writing to the authors.

Abstract: This paper reports the results of a survey conducted to assess the development impacts of USAID-supported aquaculture training programs conducted at three institutions of higher education in Kenya and Thailand. All program participants interviewed reported that they acquired specific knowledge, skills, and attitudes during the training and that it has had an important impact on their professional development. The programs have also had a marked effect on the institutions where the participants now work. Short-term training in the U.S. and short-term training in one's home country were rated as more effective training models than long-term training in the U.S.

This abstract is excerpted from the original paper, which was in *J. Higher Education and Lifelong Learning* 19(2012):1-8.

CRSP RESEARCH REPORTS are published as occasional papers by the Program Management Office, Aquaculture Collaborative Research Support Program, Oregon State University, 418 Snell Hall, Corvallis, Oregon 97331-1643 USA.
